

CLSC Lac-Saint-Louis

Eating Disorders Team

Conclusions

Conclusions

Our Achievements:

- **Screenings and interventions carried out in the schools**
- **Increased client participation in the school as opposed to the CLSC**
- **Regular team meetings to improve our communication, our consultation and our expertise**
- **The development of a «community-based approach» for eating disorders targeting adolescents aged 13 to 24 years**

Conclusions

- ***Our challenges:***
 - **A resistant clientele who do not ask for help**
 - **A clientele that does not follow through with medical and psychological intervention offered at the CLSC**
 - **An ongoing effort to develop the community-based approach and improve our services**
 - **Limited resources**

Conclusions

- ***Our future:***
 - **Provide clinics in the schools offering medical and nutritional services**
 - **Develop strategies which can offer effective services adapted to the needs of our clientele**
 - **Educate other health care workers**
 - **Continue to develop partnerships with other organizations**
